PVC Access Doors

by AAA Louvers and Millwork

All of our exterior access doors are made completely from cellular PVC with no wood to rot, split or warp over time. They are made from 3/4" thick PVC and come standard with 180 style brickmould trim and a sill on the bottom. Other styles of trim available as an option. They can be built to any dimensions to fit your application. Need a custom style? Just call us and we will custom make it to your specifications. Applications may include: Access to crawl spaces, Jacuzzi motors, knee walls, or access to any space that moisture or insects may be a problem.

Our interior access doors are made from 1-3/8" thick MDF. We use an exterior wood door jamb with Q-Lon weather-stripping on all four sides. The hinges are standard 3-1/2" mortised hinges in light brass, oil rubbed bronze or satin nickel. We custom build them to fit your needs. Give us a try the next time you need an interior access door.
