

Barricade® Building Wrap Technical Summary

Composition	High-quality woven Polyolefin
Standard Sizes	108" x 150' & 108" x 100' 54" x 150' & 36" x 150' 54" x 100' (12-pak)
Thickness	0.0035
Tensile Strength	63.3 lbs/inch MD (ASTM D-828) 51.4 lbs/inch CD (ASTM D-828)
Permeability	73.1 grams/m ² /24hrs=10.4 perms (ASTM E-96)
Water Resistance	Pass
Flame Spread	CLASS A (ASTM E-84)
Building Codes	See Evaluation Reports at www.berryplasticsbpg.com

Barricade® can help reduce air infiltration when you seal and insulate!

Look for Quality. Look for the Bear.

Barricade® OptiFlash® ▪ Barricade® Contour®
Barricade® Flash Right™ ▪ Barricade® Bead Right™ Caulk
Barricade® Sill Corners ▪ Barricade® Seam Tape
Barricade® Building Wrap ▪ Barricade® Dry Step™

Barricade® Building Wrap

Barricade® Building Wrap

Get the **Bear Maximum**, not the bare minimum

Now your home has a powerful ally against air infiltration and weather – Barricade® Building Wrap. Join the numerous builders already using Barricade, and stop air infiltration and the weather in its tracks.

■ Barricade attacks air infiltration.

Air Infiltration is energy's worst enemy. The wind robs your insulation of precious R-values, wasting the time, effort, and money spent on insulation. Barricade Building Wrap protects your insulation investment. It minimizes air infiltration at its source...the outside walls. Installed over the sheathing, Barricade seals the gaps and reduces air infiltration before it can rob your home of costly energy.

■ Barricade allows moisture to escape.

If moisture gets trapped in the walls, it can destroy the integrity of your insulation. Barricade's unique design allows it to "breathe," permitting moisture to pass through its surface.

■ Barricade is cost effective.

By minimizing air infiltration and not trapping moisture vapor, Barricade protects R-values, which can result in lower heating and cooling costs. And its semi-transparent material keeps installation costs down.

Protection from Mother Nature

Often, heavy winds pose a threat to a house wrap during installation. Barricade Building Wrap, with its tear stop design, makes it one of the most durable wraps around. So once Barricade is put up, it's **GUARANTEED TO STAY ON THE WALL**. If it doesn't we will replace it FREE.

Also, Barricade Building Wrap is UV treated. Once a building has been wrapped, it may take one to three months before the siding is installed. Barricade has special ultra violet stabilizers that protect it from the sun's harsh rays. In fact, Barricade is protected against UV-Rays for up to 4 months. Extra protection should your project go into hibernation!

Barricade Private Label

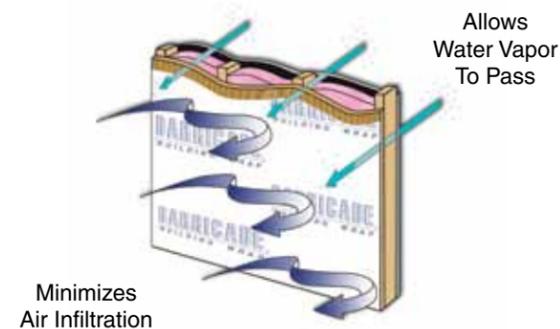

Advertising your business takes time, energy and most of all...money. Barricade Building Wrap offers a private label program that is a cost effective way to advertise your business on every home you build.

How Barricade® Building Wrap Works

Moisture Vapor

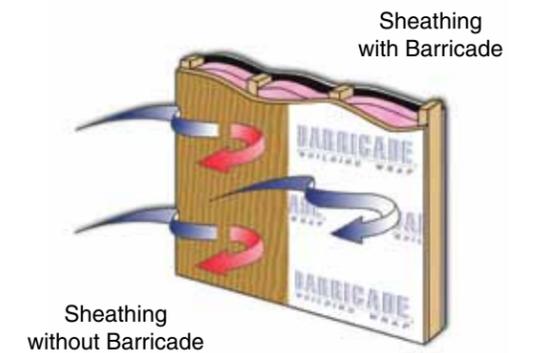

Barricade® Building Wrap is a highly effective building design strategy for minimizing air infiltration while allowing harmful moisture vapor to pass through it. Testing has revealed that Barricade has a water vapor permeability of over 73 grams per square meter per 24 hours (10.4 perms).

Barricade minimizes air infiltration while allowing moisture vapor to pass through it.

Air Infiltration

No matter how much R-Value you pack into a wall, it's vulnerable unless it's protected from air infiltration. Insulation protected by Barricade Building Wrap has proven to be much more energy efficient, protecting your insulation investment.

Barricade protects R-Values.

All Wrapped Up

Join the number of builders and home center buyers who are fighting the war against air infiltration, moisture, and the sun with Barricade, the cost effective force in building wrap.

Barricade's superior strength and ease of installation is making it a popular item with builders and the do-it-yourselfer. Barricade's support program provides invaluable assistance to builders and home center buyers with technical assistance.

Protect your investment with Barricade Building Wrap. Contact your Barricade distributor or Barricade Building Products representative today to place your order or for answers to any questions.
