

# 1600 Series

HP Impact Resistant Vinyl Windows

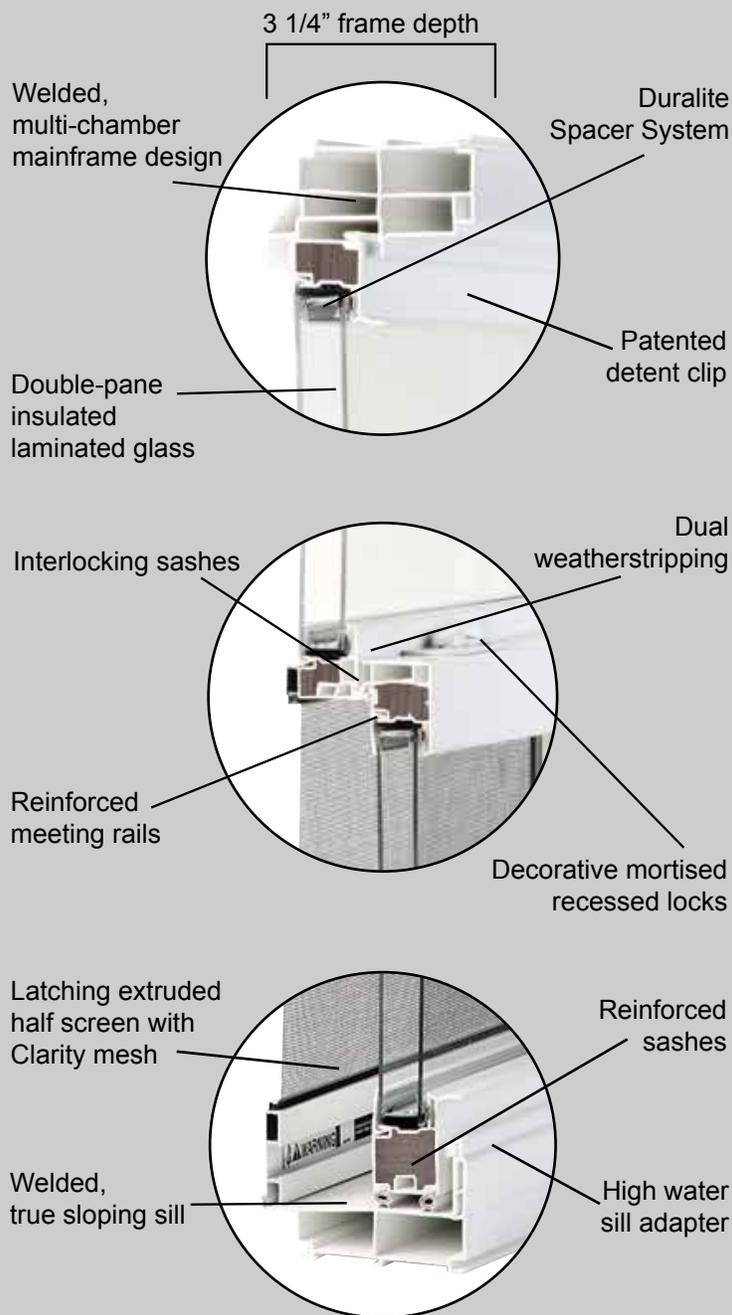

## Stand Up to the Storm

The MI Windows and Doors High Performance (HP) Impact Resistant Vinyl Window is engineered to protect your home during storm conditions and from the intrusion of flying objects, wind, and rain. HP windows have undergone rigorous testing at an AAMA certified testing lab and stand up to the rigid requirements set for impact resistance. Air and water infiltration and structural integrity are all evaluated to ensure that your windows will perform to specifications during inclement weather. These heavy-duty impact resistant windows also provide you with easy operation, low maintenance, greater safety and security.

MIWD HP Windows are available in double-hung, casement, and picture window configurations. HP Impact Resistant windows are available in single-hung and picture window configurations

## Glass Options

**TMAX™** insulated glass packages are offered as an upgrade to help you save heating and cooling costs while keeping your home more comfortable. In warm weather, TMAX reduces solar heat gain, minimizing interior glare and lowers interior glass temperature, saving energy and making your home more comfortable. In cool weather, TMAX provides outstanding thermal performance with warmer interior glass surfaces to help save energy and maintain comfort during a cold winter.

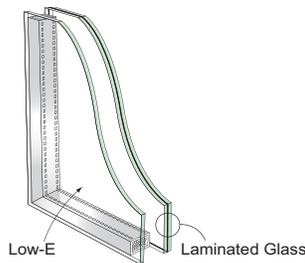

Meets ENERGY STAR® requirements in North, North-Central, and South Central Zones.

## Laminated Glass

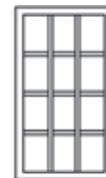

Laminated glass is created when two or more panes of glass are bonded together by a durable plastic interlayer, which enables the glass to strongly resist penetration by impacting objects. However, if it should break, the glass will tend to remain in its frame, minimizing the risk of injury from sharp edges and flying or falling glass particles.

## Grid Options

Flat grids are available in standard and custom patterns.

5/8" Flat Grid  
(between the glass)

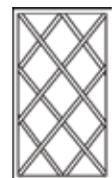

Colonial
