Vinyl Replacement Windows

It's time for new windows. There are many choices. You want your home to be unique, showcasing your style and flair. You desire the balance between quality and comfort, performance and beauty. Easton vinyl replacement windows from Vinylmax truly meet all your needs.

- 1 Fusion welded frame and sash corners are secure, weathertight and never pull apart.
- 2 Maintenance free multi-chambered vinyl provides superior strength and thermal efficiency.
- 3 Beveled exterior frame enhances curb appeal.
- 4 Full width interlock ensures drafts and the elements stay out.
- 5 Sloped sill facilitates easy water runoff and weeps moisture away.
- 6 Foam-filled compression bulb at sill seals tightly providing an impenetrable defense against wind and rain.
- 7 Multiple rows of weatherstripping of frame and sash reduce air infiltration.
- 8 Ergonomic lift rail are a fundamental part of the sash and are strategically located for the easiest operation.
- 9 Die cast cam locks provide safe and secure locking.
- 10 Flush mount tilt latches deliver sleek, clean appearance.
- 11 Double pane glass enhances insulation and reduces sound transmission.
- 12 Intercept warm-edge spacer system has proven seal integrity and conducts less heat and cold than other systems.
- 13 AAMA certified double night locks permit secure ventilation.
- 14 Constant force balance system allows sashes to move freely with no adjustment needed.
- 15 Tilt in, lift out sashes allow convenient cleaning from inside the home.
- 16 Extruded aluminum screen frame features BetterVue mesh to keep pest out.

Envision your showplace with any style of window you can imagine.

Customizing your Easton Vinyl Replacement Windows to reflect your personal preferences is easy. Choose window styles, colors, and decorative options to create the design ambience that make your home unique. Vinylmax offers the perfect solution.

## Other Available Styles

**Easton Sliders**  
provide easy ventilation. Available in 2 and 3 lite styles.

**Architectural Shapes and Picture Windows**  
combine to create elegant drama.

*Maximum Energy Efficiency is the true measure of window quality. By choosing an IntelliGlass high-performance glass package, your satisfaction is assured. Here's how IntelliGlass creates a high-performance advantage for your home.*

An industry-proven system, Intercept Spacer continues to be the hallmark of glass performance. The secret is its flexible u-channel design. When temperatures fluctuate, the spacer flexes, leaving the seal intact.

Patented U-shape construction is visually appealing.  
Proven Argon Retention ensures your windows perform for a lifetime.  
Superior Warm Edge Performance lowers your energy bills.  
Strongest Corners available prevent seal failures.  
Grid-locking system keeps grids straight and secure.

Solar Control Low E Glass gives every IntelliGlass package its energy efficient foundation. Argon and Krypton gases act like a warm blanket between the panes of glass, adding extra insulation.

Two microscopic layers of silver reflect heat back to its source.  
Titanium dioxide layer protects the silver, so it lasts for a lifetime.  
Your home is cooler in the summer, as solar heat is reflected away.  
Your home is warmer in the winter as furnace heat is reflected back into the home.

**R5.** The next generation of energy efficiency. **TODAY.**

Everyone wants to save energy. The ENERGY STAR program has been setting standards to guide consumers in making wise decisions to save energy. As products become more efficient, ENERGY STAR adjusts these standards to reflect improvements in technology.

The next standard for highly efficient windows and patio doors is R5. This increases the threshold for insulating value in windows and doors, creating dramatic energy savings.

By selecting one of our triple pane options, IntelliGlass High Performance glazing systems meet or exceed the R5 window standards set forth by the U.S. Department of Energy in most windows.
